Microsoft Project
AutoCAD 2D/3D/Civil3D

SUMMARY

A Civil Engineer with 2 years experience managing and monitoring project implementation and another 2 years experience in Project Planning and Management of a multi-billion peso project. Proven ability to apply exceptional problem solving skills, analytical skills with software proficiency and technical knowledge to provide solutions to construction project challenges.

EXPERIENCE

Department of Social Welfare and Development

Technical Facilitator / Oct 2021- present

- Oversaw 27 infrastructure projects in KALAHI-CIDSS NCDDP AF program, including slope protection, roads, and relief facility construction.
- Created project WBS, set weekly targets, monitored progress, and provided weekly reports.
- Analyzed monthly financial reports to calculate project actual costs, closely monitored disbursements and payments, and took proactive measures to prevent project overbudgeting.
- Led meetings to present project status, address stakeholder concerns, and provide instructions and solutions for subproject implementation challenges.
- Produced essential documents related to program implementation, including Program of Works, Work Schedule, Manpower Schedule, Variation Orders, Purchase Orders, etc.

VA Tech Wabag Philippines, Inc.

Planning Engineer / October 2018 - May 2020

- Efficiently coordinated and scheduled 1000+ construction activities for a sewage treatment plant with 20+ structures across diverse disciplines, including civil, and MEIP.

ACHIEVEMENTS

7TH PLACER (91.85%)

Civil Engineers Licensure Exam
*Professional Regulation Commission,
Board of Civil Engg.*

GWA (1.92)

BS in Civil Engineering
Camarines Norte State College

1ST RUNNER UP

EXPERIENCE CONTINUED...

- Managed daily project activities across all disciplines, proposed weekly targets to the team, and conducted progress updates with the consultant and client on a weekly basis to discuss achievements and milestones.
- Actively engaged in high-level meetings and discussions, including those with top management, to address and overcome challenges hindering project completion and profitability.
- Participated in discussions and closely monitored proposed actions to enhance the project's net cash flow. Coordinated with different company departments to ensure efficient implementation of the plan in alignment with project objectives.
- Thoroughly prepared and submitted various documents, such as Progress Billings, Weekly Accomplishment Reports and Presentations, Extensions of Time Claim, Variation Orders, and other necessary submissions for management, consultant, and client review and approval.

DPWH - Camarines Norte DEO

Engineer I - Planning Section/ February 20- July 2018

- Designed horizontal structures and prepared documents including POWs, detailed estimates and unit price analysis for 15 projects consistently ahead or within established timelines saving resources.
- Developed Excel spreadsheets and intelligent CAD objects that led to substantial time savings for the company, totaling at least 60 working hours.
- Led our section in design audits by conducting flood and structural analysis for flood control projects, evaluating the effectiveness of the design in mitigating flood risks and ensuring structural integrity.
- Utilized Gantt Charts and Critical Path Method (CPM) techniques to create baseline schedules for 30+ projects, enabling effective project planning, resource allocation, and progress tracking throughout the project lifecycle.
